The following are interface concepts for Flux Notes Full, focused on a pre-encounter view within an oncology setting. These concepts continue to be refined based on new feedback and discussion. Near future design considerations include taking a responsive design approach to the visualizations so that it works at multiple sizes + describing how data loading would appear in the UI.

Red circles denote specific questions that can be asked to clinicians for validation and feedback, or points of discussion/consideration for future versions.

Blue calls out new design updates from the previous version.
