

ENCOUNTER CARCINOMA OF BREAST v13.2 (DATA CAPTURE/RETRIEVAL CONCEPTS)

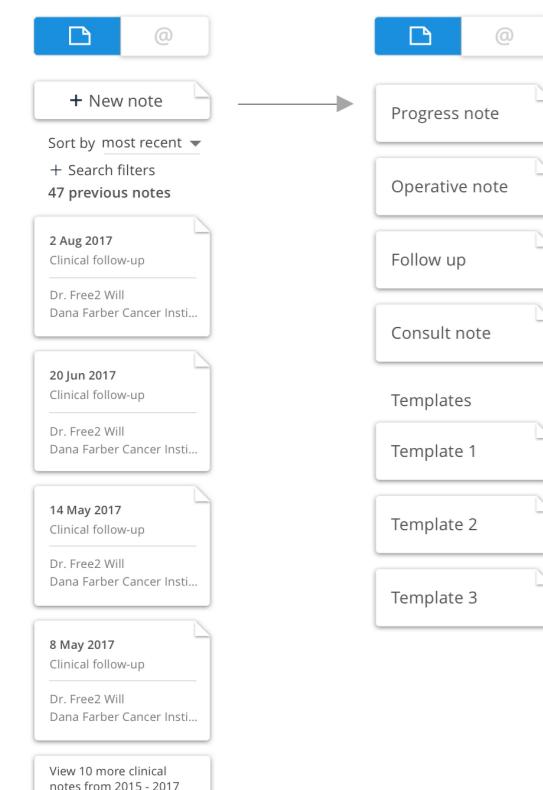

EDWIN CHOI, DANIEL REEVES, JUHAN SONIN, 30.MAR.2018

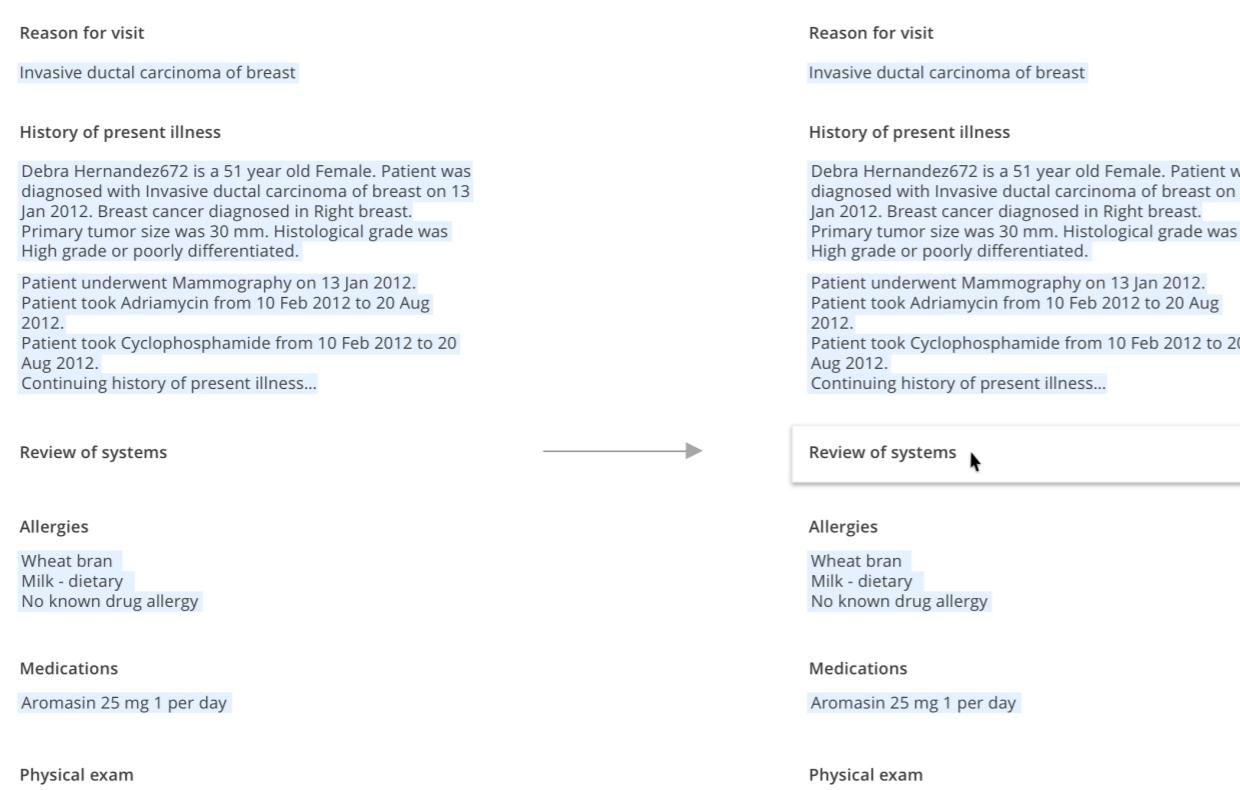

The following are additional concepts exploring data capture and retrieval within Flux Notes Full in order to reduce provider burden. The following concepts should be seen as low-fidelity and used for brainstorming and discussion. The concepts with the most promise will be designed in further detail this week.

1 DATA CAPTURE CONCEPT: POS

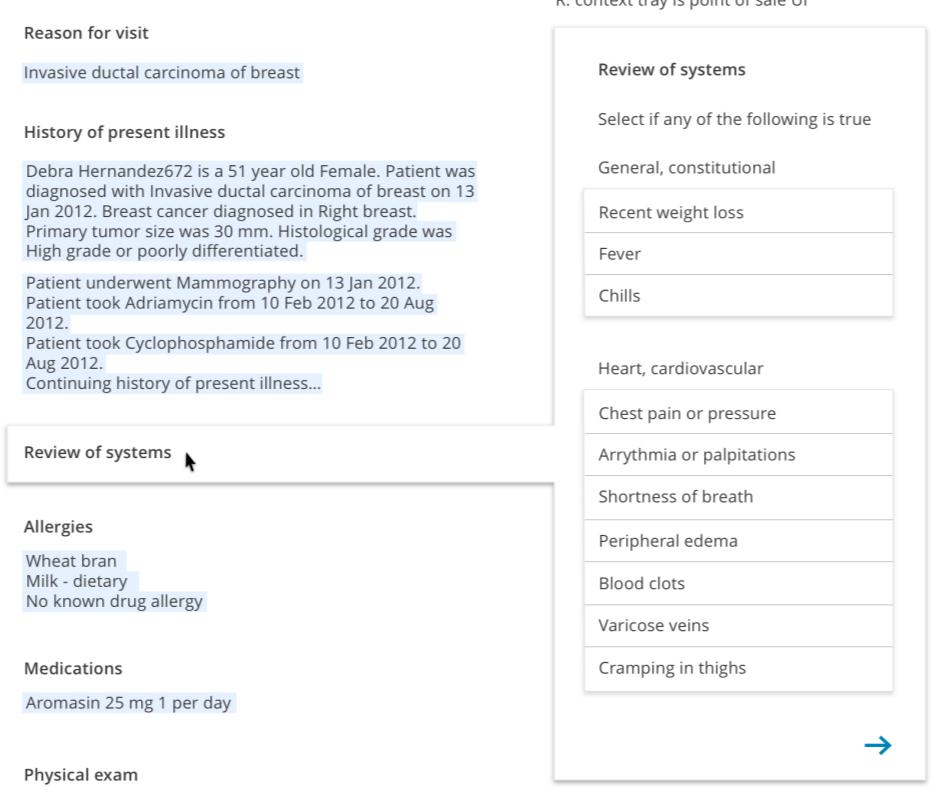

1.1 DATA CAPTURE CONCEPT: POS

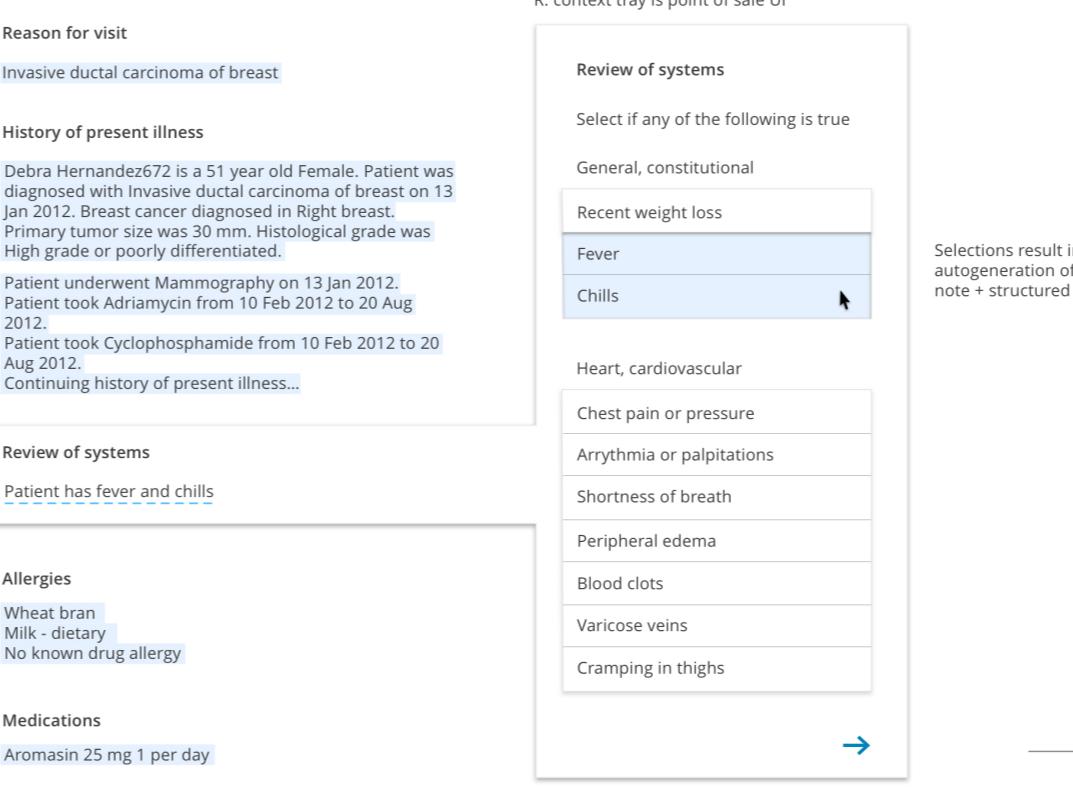

1.2 SEARCH - SHORT TERM DESIGN

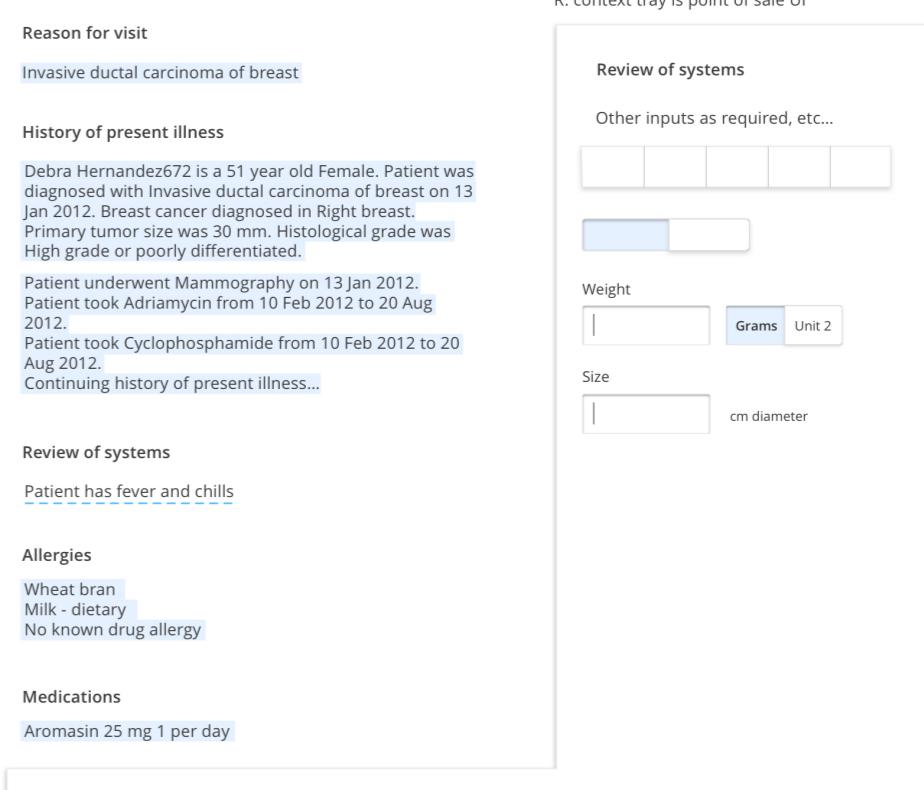

1.3 SEARCH - SHORT TERM DESIGN

1.4 SEARCH - SHORT TERM DESIGN

1.5 SEARCH - SHORT TERM DESIGN

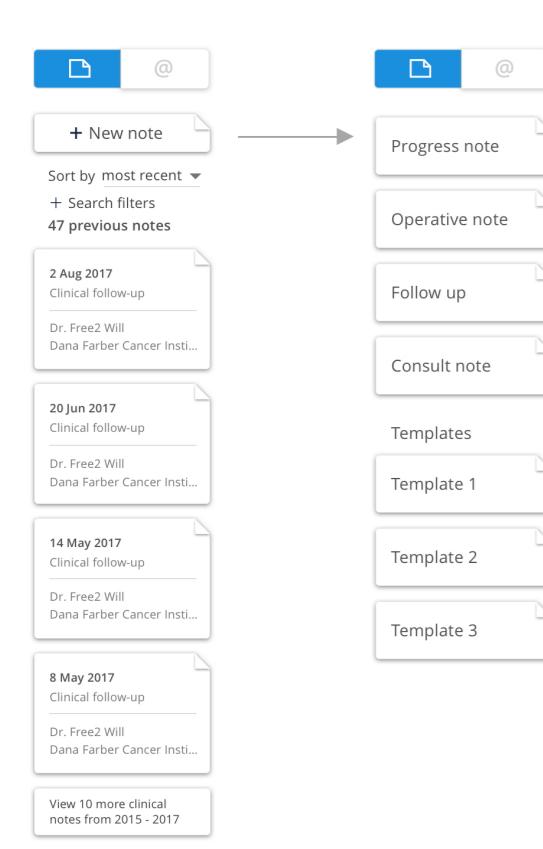

Model for point of sale?
But users can alternately go back to shorthand # mode

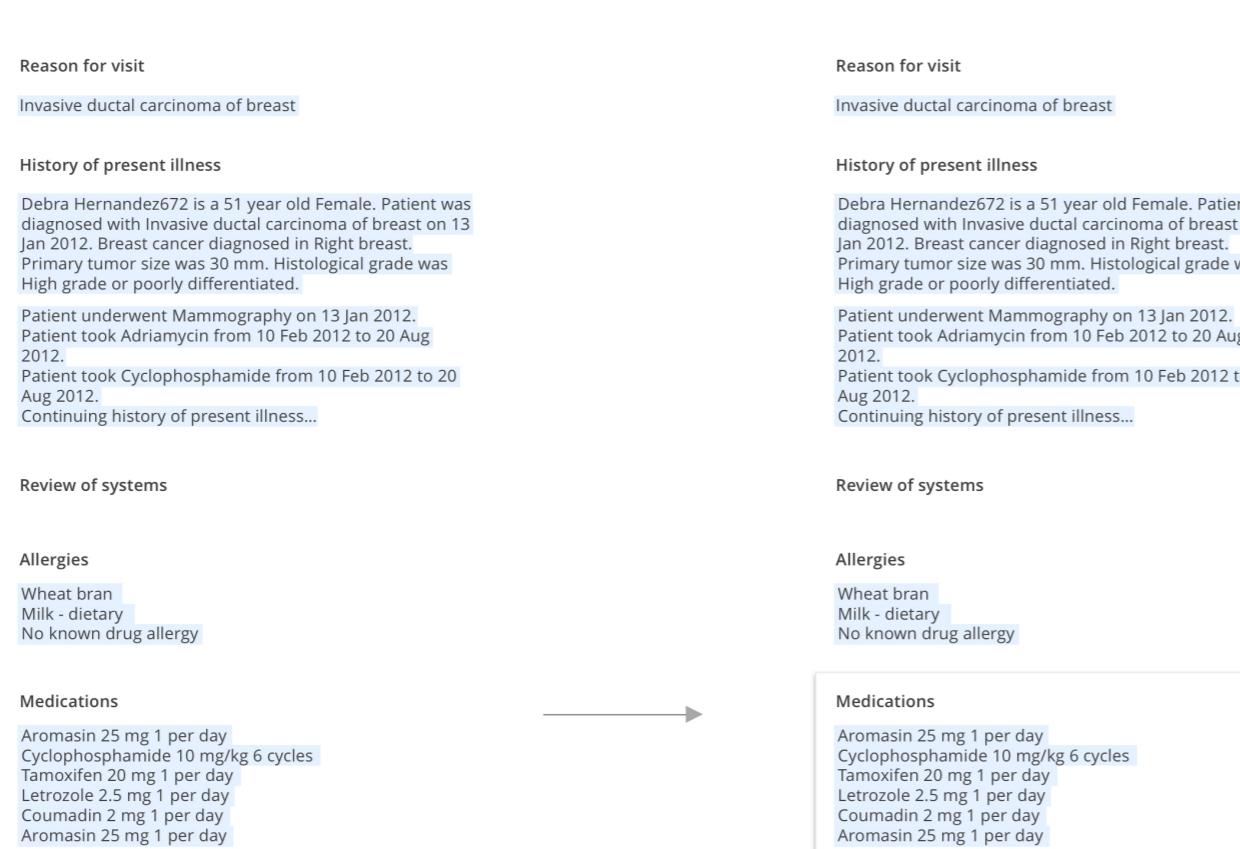

Continue onto other sections where input are required before final signing of the note

2 DATA RETRIEVAL CONCEPT: POS

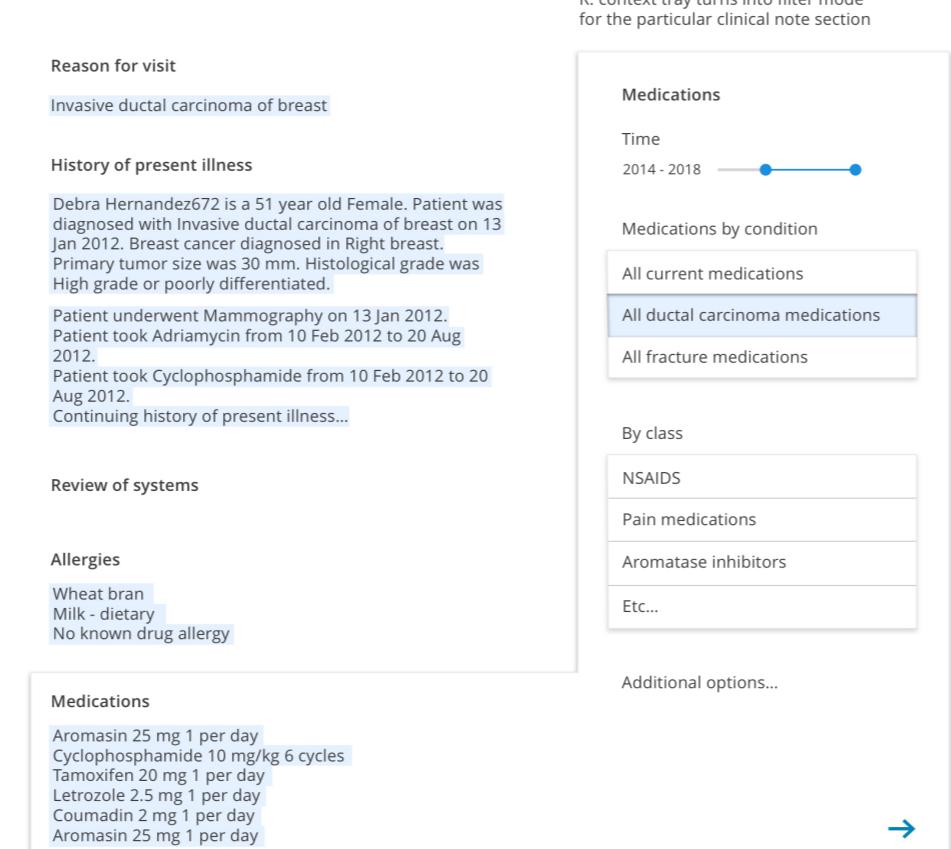

2.1 DATA RETRIEVAL CONCEPT: POS

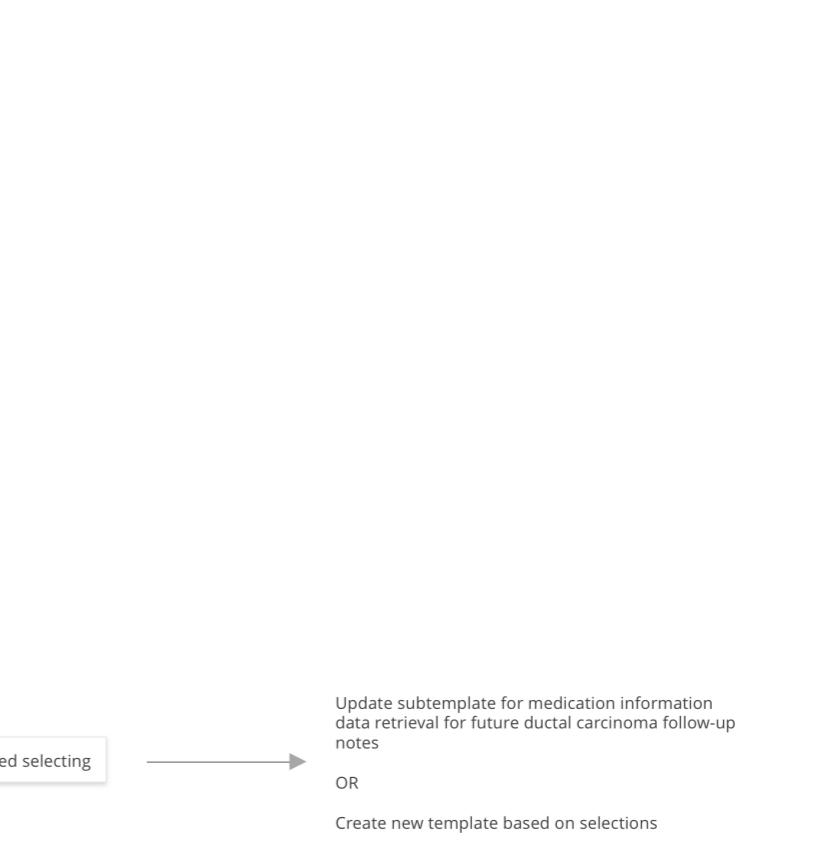

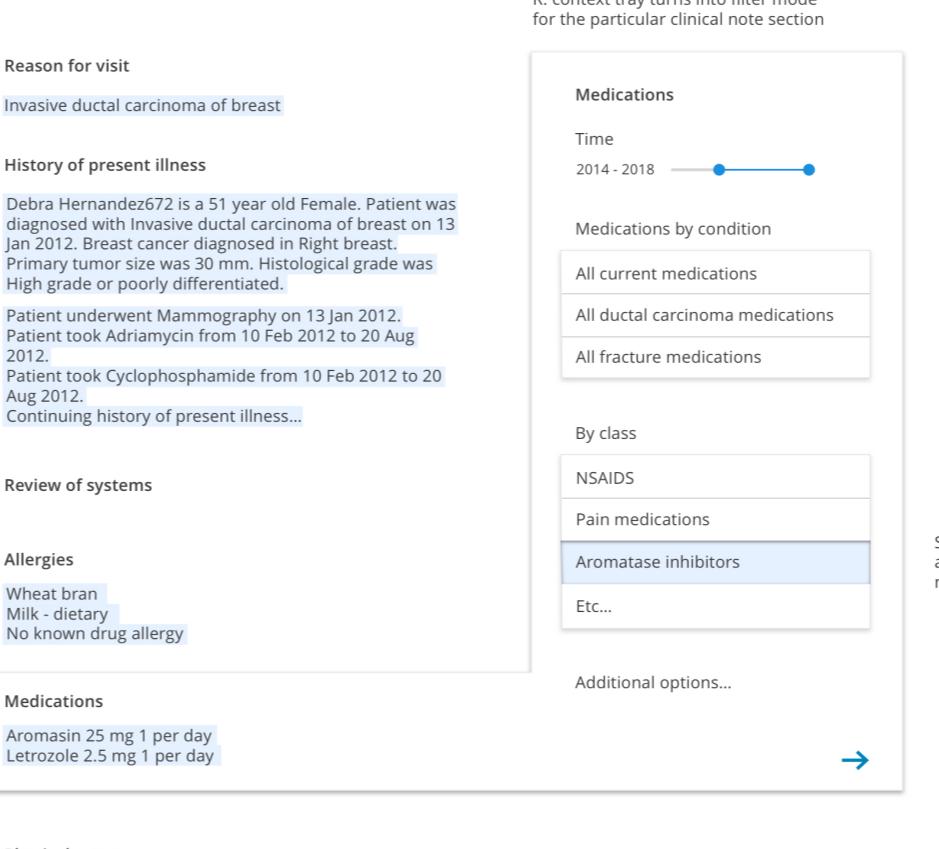

2.2 DATA RETRIEVAL CONCEPT: POS

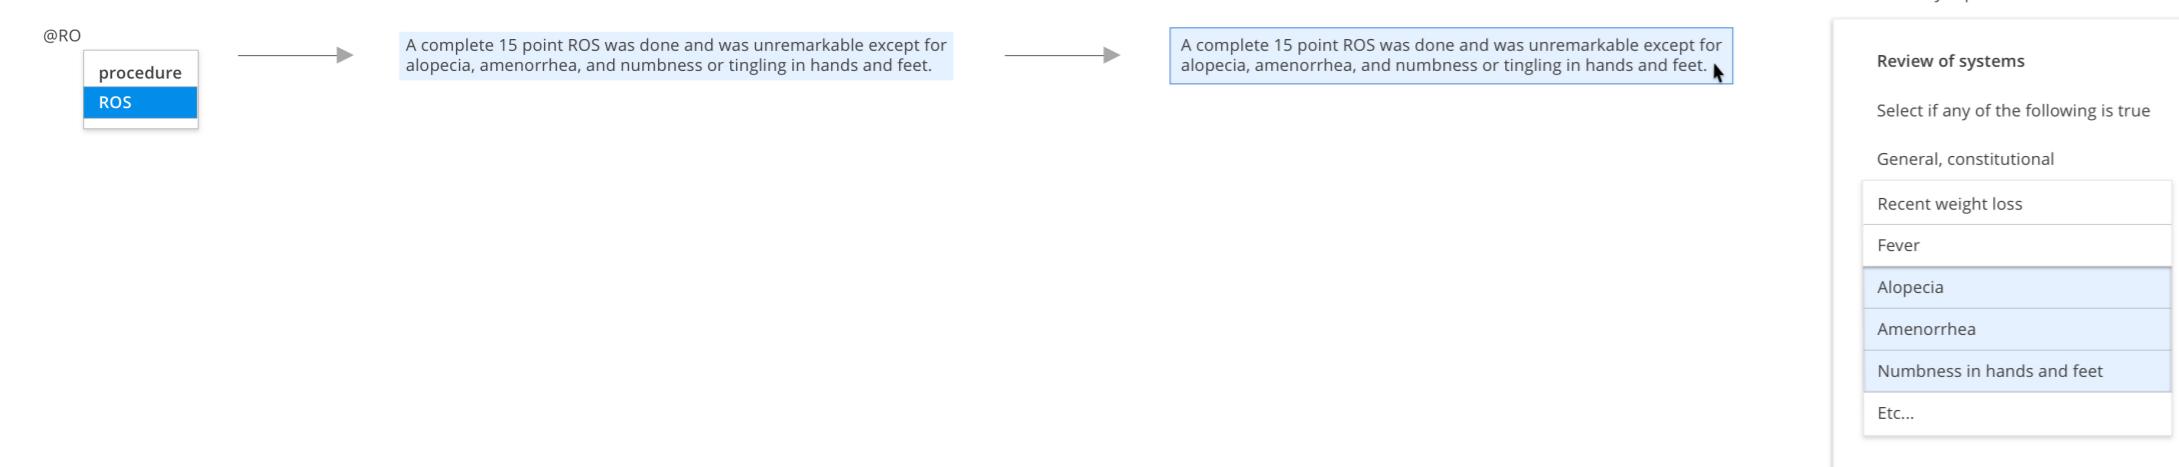

2.3 DATA RETRIEVAL CONCEPT: POS

2.4 DATA RETRIEVAL CONCEPT: POS

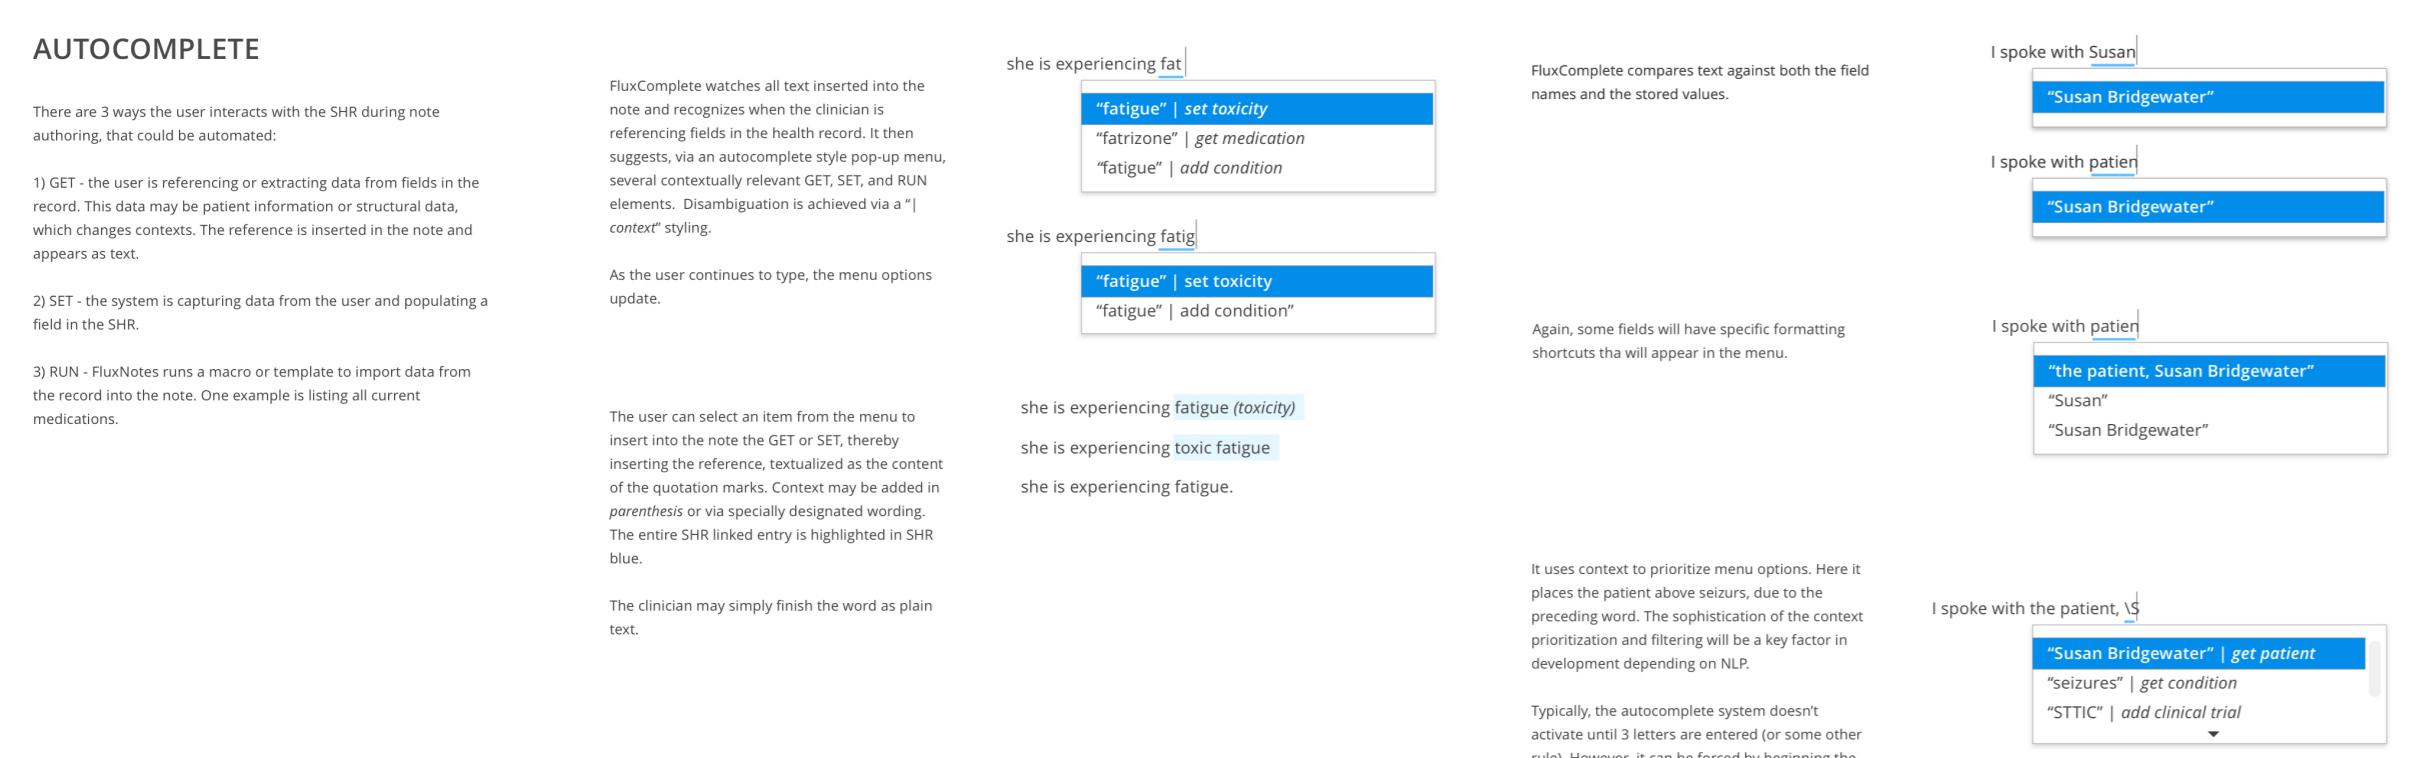

2.5 DATA RETRIEVAL CONCEPT: POS

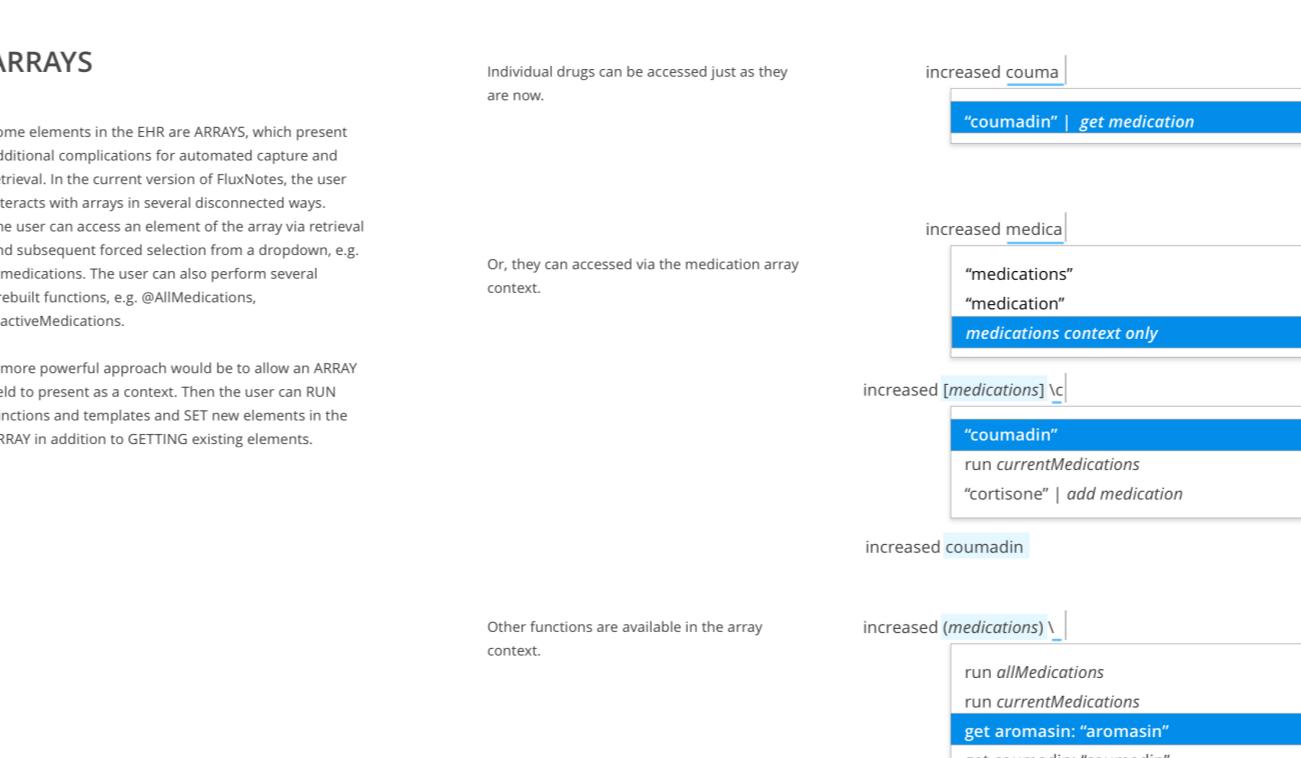

3 TEXT COMPLETE CONCEPTS

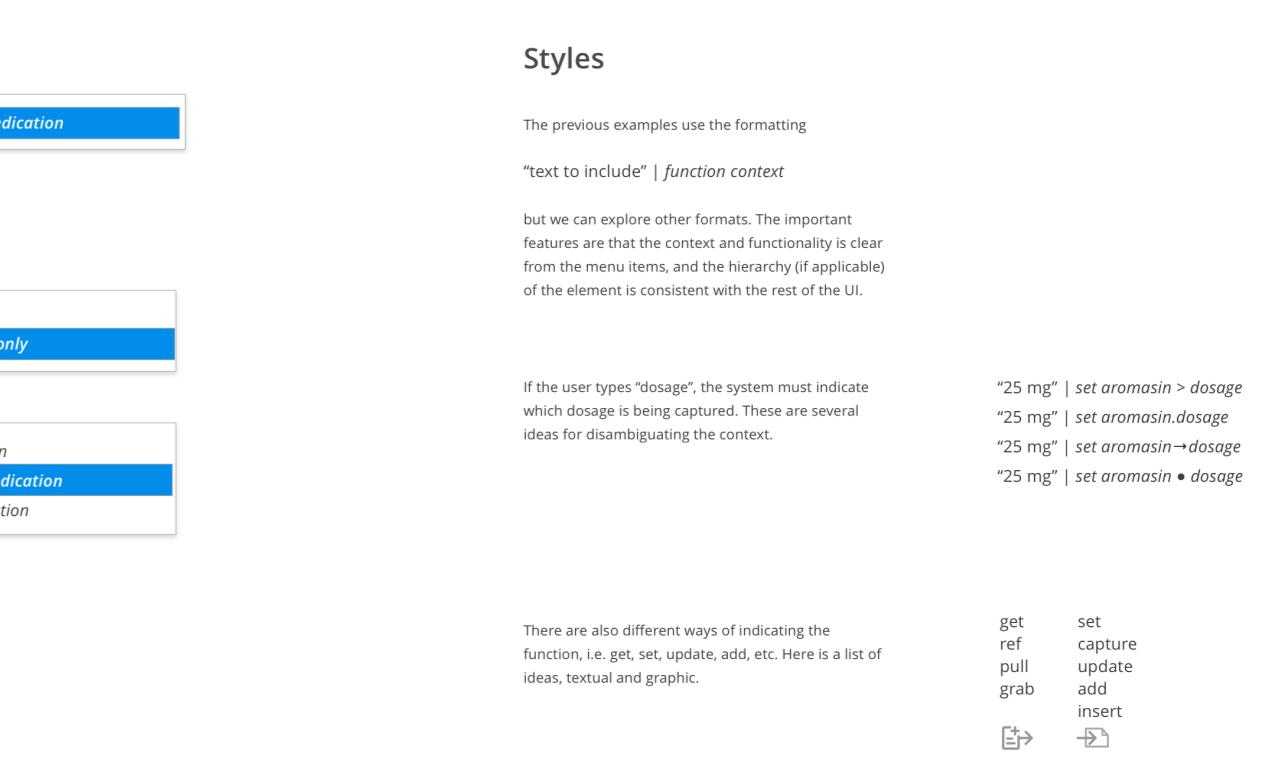

3.1 TEXT COMPLETE CONCEPTS

3.2 TEXT COMPLETE CONCEPTS

3.3 TEXT COMPLETE CONCEPTS

4 ADDITIONAL CONCEPTS FOR LOWERING BURDEN

4.1 ADDITIONAL CONCEPTS FOR LOWERING BURDEN

Patient has taken @medications.
They are currently taking @active medications.

Hotkeys save provider created phrases

If the user types "doseage" the system must indicate which dosage is being captured. These are several ideas for disambiguating the context.

"25 mg" | set aromasin + dosage
"25 mg" | set aromasin-dosage
"25 mg" | set aromasin + dose
"25 mg" | set aromasin-dose
